Customer Problem Statement

I am

a college student studying late at night.

I'm trying to

quickly order food without interrupting my workflow.

But

it takes too long to find reliable restaurants that are actually open and deliver on time.

Because

many apps show too many options, unclear availability, and uncertain delivery times.

Which makes me feel

frustrated, anxious, and distracted from my work.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a hungry user ordering food during unconventional hours.	make a confident decision about what to eat.	I cannot fully trust the reviews, pricing clarity, and final delivery cost shown upfront.	hidden charges and inconsistent experiences have reduced my trust in food delivery platforms.	uncertain and hesitant before placing my order.
PS-2	a time-sensitive user with low energy late at night.	complete my order in the fastest and simplest way possible.	the checkout process feels lengthy and requires multiple steps and repeated information.	the platform does not minimize effort or support quick decision-making.	mentally drained and impatient.
